### Fund overview

Sentry Corporate Bond Class's investment objective is to provide investors with a return that is similar to the return of Sentry Corporate Bond Fund, or another North American and/or international bond fund managed by us (the "Reference Fund"). The investment objective of the Reference Fund is to provide investors with income and the potential for long-term capital appreciation by investing in a portfolio consisting primarily of North American and/or international investment grade and non-investment grade corporate bonds and may also invest in real-return bonds, preferred shares, convertible securities or other fixed-income securities. The fund purchases primarily Canadian equity securities which it sells forward under a series of forward contracts in order to provide the fund with a return that is based on the performance of the Reference Fund. In addition, or in the alternative, the fund may invest directly in fixed-income securities similar to those held by the Reference Fund.

\* The risk meter is based on the methodology recommended by the Fund Risk Classification Task Force of the Investment Funds Institute of Canada. The Task Force recommends that a risk assessment should be considered relative to the historical volatility risk as measured by the standard deviation of performance for the fund and its benchmark. The Task Force also acknowledges that other types of measurable and non-measurable risk may exist. The Task Force reminds investors that historical performance may not be indicative of future returns and a fund's historical volatility may not be indicative of future volatility. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compound total returns net of fees (except for figures of one year or less, which are simple total returns) including changes in security value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Percentages will fluctuate over the life of the mutual fund as the market value of each issuer changes. The portfolio manager(s) may change the percentage range in some or all of the sectors. The information contained herein is not an offer to sell nor a solicitation to buy any security. Such an offer can only be made by prospectus or other applicable offering document.
